Assistive Technology Online Training with Zoom

Please install Zoom on the device that the lesson will be done with. If your child is using a school-provided device please request that Zoom be installed as soon as possible. If this is not possible, we can still have a lesson using the software on my computer with any of your own home computers.

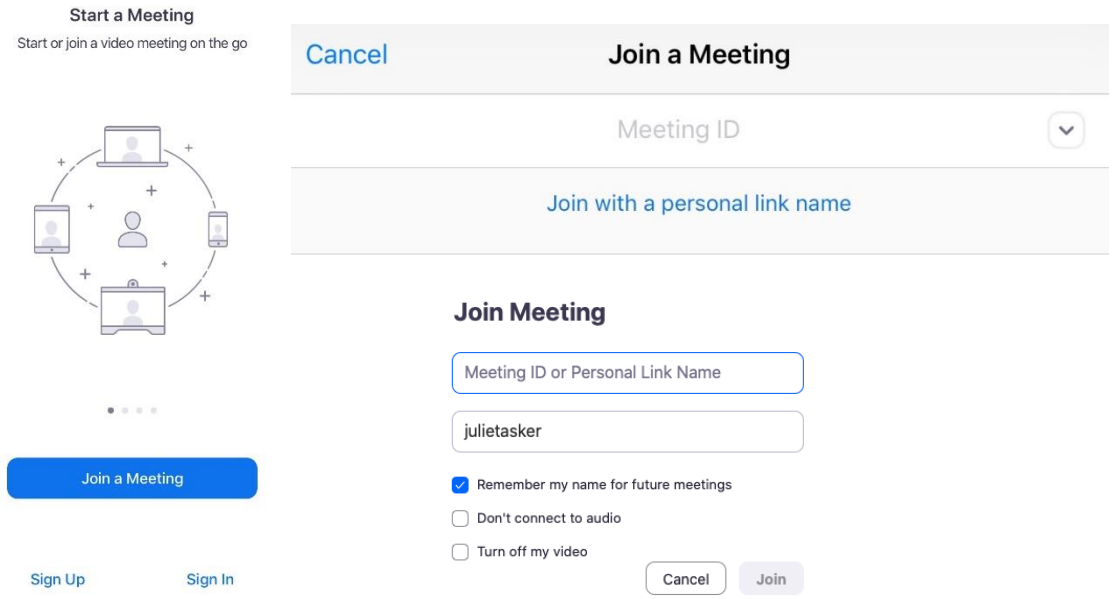
Install Zoom from https://zoom.us/

On the day of the lesson:

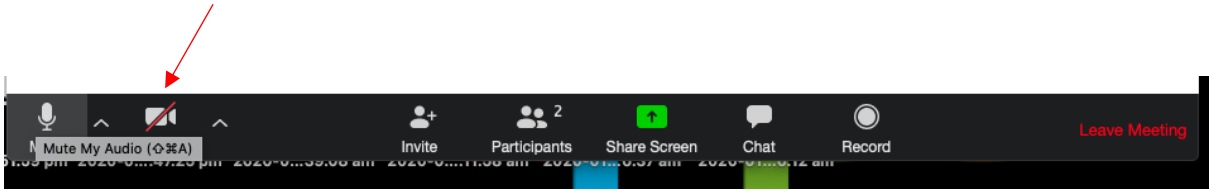
Please be ready with homework activities ready to share on screen.

On the morning of the lesson you will be emailed a link and a Meeting ID number.

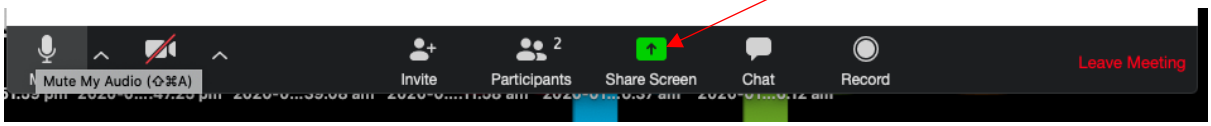
1. 5 minutes before lesson time: Open Zoom and Join the meeting. Enter the Meeting ID number.



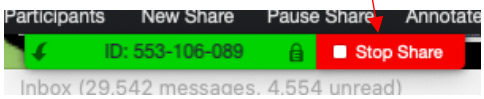
2. Turn on video so that I can see your child:



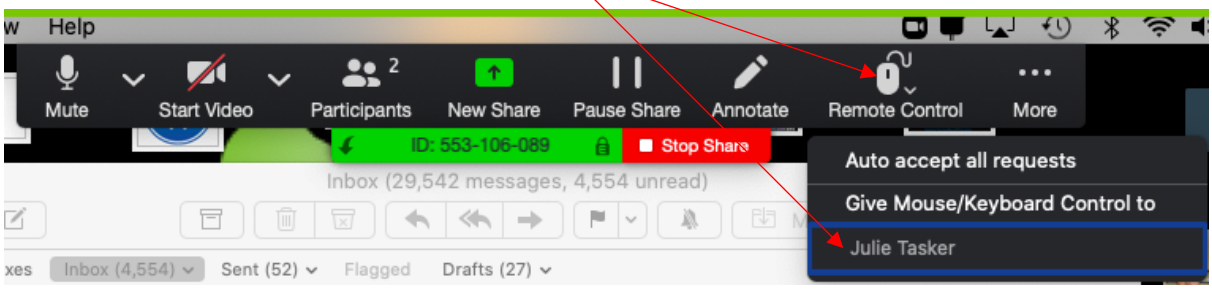
3. When prompted to share the screen with me, click on Share Screen:



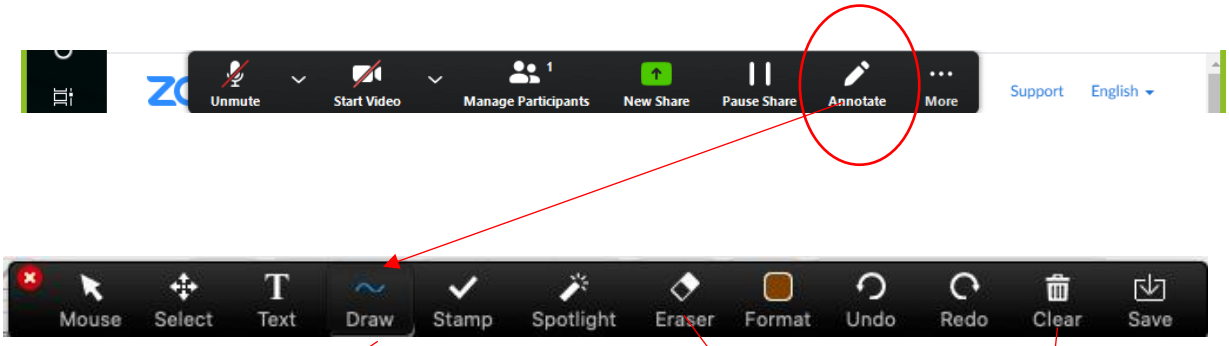
To stop sharing screen- click Stop Share

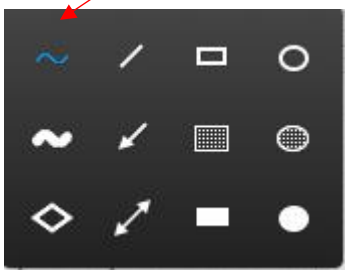


4. If prompted to allow me to control the screen, please go to Remote control and click on my name for 'Give Mouse/Keyboard Control'



5. There is a toolbar where your child may need to write on the screen if necessary:





Eraser to rub out writing

Use this to clear all writing quickly from the screen

It is best to draw on the screen with a stylus. Please don't let your child draw with their finger.

I look forward to seeing you online!
